

Panthers' Home Learning

First half of Summer term 2018

Choose five things from the list below to complete during this half term. To be handed in on the week beginning Monday 21st May. Present your work neatly in your homework book and then fill in your record sheet for each task. If you are struggling with anything then please come and see me for help.

Story challenge: Use the pictures above to create a story. Try to write a beginning, middle and end. Your story should have speech and description of what your main character/s is/are feeling and what they are seeing and doing. You have to write at least 200 words but your upper limit is 500 words. Good luck.

“Bread and Butter Learning” - these are the things that you need to do at least 4 times a week.

- 1) Reading out loud- you can read anything from a magazine to your reading book.
- 2) Times tables rocks. Try to play this for at least ten minutes a night to boost your times table knowledge.
- 3) In the books you read, find words you don't know and look them up in the dictionary. Try and say them out loud in your own sentences to make sure you know how to use them.

English

- As you know, I love playing and listening to music but sadly my modern music knowledge is fairly limited. I'd like you to pick an artist that has been popular within the last two or three years and tell me about him/her/them. I want to know their name, what hits they have had, why I might like them and why you like them.
- Write an acrostic poem or haiku on success and draw an image around it linked to the poem.
- Create a map for an imaginary world and make sure that it has a place where a villain lives and a place where a hero lives. Draw it and label it and create character descriptions for both the hero and villain.
- Write a set of instructions for one of the following: How to defeat a dragon. How to remove apps from your phone. How to spend more time outdoors. How to rid your house of pesky imps.

Music

Log on to Charanga using your password and username and complete the lesson I have put on there. You can also keep using the musical world.

Maths

Solve the following questions:

- 1) List four factors of 94
- 2) What is 345×11
- 3) List the first 5 multiples of either 4, 5, 6 or 7.
- 4) What is the product of 12 and 8
- 5) Two prime numbers added together equal an even number. List all the possibilities.
- 6) Solve this logic puzzle on the right:
